PAIN RELIEF PROGRAM

For the help with dental pain by grown ups

Medical prevention and Screening programs

During the dental camps there is always time in the program to help grownups with dental pain.

- Main goal is to help people and treat only the teeth witch the patient is complaining about
- Give the patient the necessary information to make right decision for treatment
- Provide the patient with the necessary medicine if indicated
- Take care for suitable follow up if needed
- Refer patient to other health care if needed
